

- CUROMAK - WATER LIQUID RESIN FOR LACQUERED FLOORS

CUROMAK by Makros is a special water liquid resin, with a pleasant scent, that thanks to its protective power, is able to close the micro-cracks, and surface abrasions (responsible of the opacification of the floor) caused by general wear and tear.

USE INSTRUCTIONS:

Pour 150-200 ml of CUROMAK in 2 litres of lukewarm water and mix the content well. Distend the product in a uniform manner. Care should be taken to avoid excessive build up. The drying process will take about 30 minutes.

For very opacised floors, you can increase the quantity of product to a maximum dose of 500 ml into 2 litres of water.

We recommend the treatment of **CUROMAK** at least 3-4 times a year.

Caution:

This may cause the floor to become excessively bright. We recommend using the quantities indicated.

Attention:

To be able to reuse the cloth it's necessary to wash it carefully in warm water immediately after each treatment.

CUROMAK respects the environment and the health of the user by observing the regulations in force (Legislative Decree 161/2006)
